EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Bachelor of Science in Computer Science, Concentration in PL Theory, Minor in Physics | GPA: 3.89/4.0

May 2025

Relevant Courses: Compiler Design, Database Systems, Networking and the Internet, Machine Learning, Algorithm Design and Analysis, Foundations of Programming Languages, Higher-Order Typed Compilation, Advanced Computational Physics

EXPERIENCE

Software Development Engineer Intern

Seattle, WA

Amazon

May 2024 – August 2024

- Built a per-tenant workflow provisioner for fraud and risk mitigation
- Implemented AWS Step Functions, Amazon S3, and AWS Lambda infrastructure using AWS CDK in Typescript
- Designed interface definition with API Gateway integration using Smithy

Software Engineering Intern

Pittsburgh, PA

CMU Computer Science Academy

January 2024 – December 2024

- Contributed to development and maintenance of CS Academy website, an online Python curriculum for high school and CMU students
- Built front-end features with React, Redux, and SCSS to enhance teacher and student experience
- Implemented keystroke tracking with precise timing using Django for accurate plagiarism detection

Teaching Assistant

Pittsburgh, PA

Carnegie Mellon University

January 2023 – May 2025

- Led weekly recitation lectures and hold office hours for Compiler Design / Principles of Functional Programming
- Conducted code reviews for organization and documentation across student codebases
- Provided feedback on hundreds of students' homework assignments and exams

CMU Computer Science Academy CPCS/Outreach Team

Pittsburgh, PA

CMU Computer Science Academy

July 2022 – December 2023

- Designed and reviewed notes and exercises for online Python course
- Co-led professional development sessions to teach course content to high school teachers
- Resolved Freshdesk support tickets by assisting with debugging and clarifying course content

PROJECTS

OSI Model Network, Transport, and Application Layers

Networking and the Internet Projects

December 2024

- Built mixnet in C using Spanning Tree Protocol, using shortest-path algorithm to optimize for latency
- Performed TCP handshakes and implemented TCP Reno algorithm for congestion control
- Utilized Berkeley socket API to send HTTP requests via pipelining and parallel connections

C0 Compiler

Compiler Design Project

May 2024

- Developed a Rust-based compiler for C0, a safe subset of C
- Applied series of optimizations which outperformed GCC benchmarks
- Integrated LLVM support and compilation for 32-bit x86 assembly

Sprintdle

Personal Project

August 2023

- Built a website application inspired by Wordle using HTML/CSS and Javascript
- Implemented multiple diverse game modes such as Classic, Frenzy, and Survival
- Designed a how-to-play section and a statistics section based off local storage

paigeBot

Personal Project

January 2023

- Created a social media application that quizzes users about images from entertainment media
- Used Python to request from multiple database APIs and schedule coroutines concurrently

SKILLS

Languages: Python, C/C++, Rust, Java, HTML/CSS, Javascript/Typescript, OCaml, SQL, R

Other: Git, OpenMP, OpenACC, MPI, Apache Spark, PyTorch, TensorFlow, x86 assembly, React, LaTeX
